Logistics 4.0 for Industry 4.0

Full integration into existing system environments

## Software Facts

- ➔ Fully automatic handling of the warehouse incl. all processes of storage and storage removal
- ➔ Full real-time integration into any ERP system, e.g. SAP
- ➔ Real-time communication via SLA Connector with all conveyor systems, PLC, production machines, robots & industrial periphery
- ➔ Real-time monitoring of all machines and processes – fast recognition of critical situations
- ➔ Execution of fully automated actions, e.g. supply of goods in tumbler or other production machines
- ➔ Efficient management of all goods movements and current stocks
- ➔ Modern, flexible and modular web technology
- ➔ Configurable regarding customer requirements
- ➔ Implementation of individual storage strategies

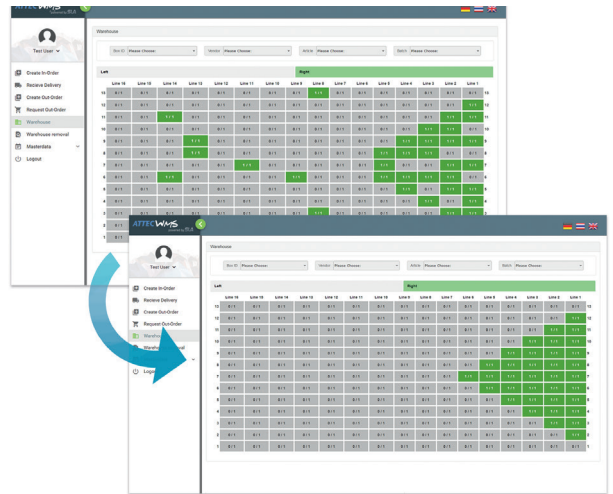

Process visualization

## Key Advantages

- ➔ High grade of automatization (Industry 4.0)
- ➔ 3D simulations of future processes
- ➔ Optimization of planning and controlling of all incoming and outgoing goods
- ➔ Automatic determination of optimal storage locations
- ➔ Complete transparency and traceability
- ➔ Improved planning of inventory
- ➔ Increase of delivery flexibility and quality
- ➔ Language changes on the fly

Storage optimization

With regard to Industry 4.0 it is necessary to network with strong partners in order to remain competitive and to fully exploit the potential of digitalization.

And that's how we do – together with our partner SLA Software Logistik Artland GmbH we accompany companies on their way to the digital future!

- ➔ Innovative, market-leading solutions, which bring production and logistics into a networked future
- ➔ Common expert support team
- ➔ International and worldwide 24/7 Service

CUSTOMER FOCUSED. PERSONALLY. ALWAYS THERE FOR YOU - SIMPLY CLOSER!
